question 1

<<nil.<nil.nil>>.<<nil.<nil.<nil.nil>>>.<<nil.nil>.nil>>>

<<<nil.nil>.<nil.<nil.nil>>>.<<<nil.nil>.nil>.<<<nil.<nil.nil>>.<<nil.nil>.nil>>.nil>>>

<<<nil.nil>.<nil.nil>>.<<<<nil.nil>.nil>.nil>.<<nil.<nil.nil>.nil>>.nil>>>

A list containing number X must therefore be encoded as a list containing that $X + 1$ many brackets.

a) is a list of numbers, as the outermost construct is a list.

the list encodes numbers [2,3,0]

it encodes a malformed list of lists of numbers,

b) is a list of numbers, as the outermost construct is a list.

c) is a list of numbers, as the outermost construct is a list.

question 2
